

Company Profile

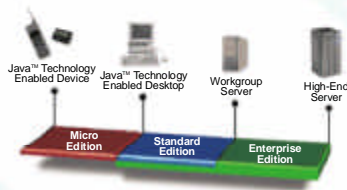

Endeavour Internet Business Solutions is a leading edge technology company dedicated to providing a new generation of business solutions for a new era of mobile and distributed computing.

The company has developed a number of products such as an e-commerce suite, portal technology, a customer profiling advertising system and a stockbroking intermediary system. The company takes a consultancy-driven approach to entrusted projects. Endeavour believes in applying technology to bring about a paradigm shift that creates dramatic business benefits. This involves process re-engineering and integration of back-end systems to leverage the capabilities of a company as a cohesive whole.

Technology

Endeavour's technology espouses Sun's vision of vendor independent Write Once, Run Anywhere applications based on open standards. Endeavour's technology is based on Java 2 Enterprise Edition and encompasses the use of Java Smart Cards, Java TV, Java Message Service, Java Transaction Service, Java Mail, Remote Method Invocation, Server-side Servlets, Java Cryptographic Engine and Java Database Connectivity.

Secure Online Payments

Endeavour developed and operates the Endeavour Secure Internet Payment Gateway (EPG). The Gateway accepts MasterCard and Visa credit cards as well as BOV CashLink and APS Premier debit cards. The system is based on robust Java technology and features back-end database encryption and browser based SSL encryption.

An online merchant interface provides a feature rich environment within which a merchant can manage his online transactions. Searches, reversals, reporting and exporting into accounts systems are all supported.

Endeavour has also developed and deployed the Phalanx Fraud Detection System for use with EPG. The advanced features provide merchants with the information they need to manage risks on online transactions.

The Gateway is operated under <https://www.ecommercemalta.com>
